Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The amendment filed 10/23/2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

The text added to the following page 11, line 24: "As shown schematically in Figure 9," is not supported by the original specification, and the Applicant should note that the drawing (Figure 9) filed 5/19/06 has not been entered.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 3 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant now stresses the limitation "the housing having a base part and a plurality of modules being releasably mounted to said base part via a hinge part, one of said plurality of

Art Unit: 2615

modules being a wireless signal transmission module and another one of said plurality of modules being a battery compartment module". A careful review of the original specification has been made and no reference for such a feature has been found. Nor do the original drawings depict the construction of a plurality of modules being releasably mounted to the base part via a hinge part, one of the plurality of modules being a wireless signal transmission module and another one of said plurality of modules being a battery compartment module"

It therefore does not appear that Applicant had procession of this feature at the time of filling.

Response to Arguments

4. Applicant's arguments filed 10/23/06 have been fully considered but they are not persuasive.

The original specification does not disclose that the plurality of modules 51 are releasably mounted to the base part of the housing (3) via a hinge part, and one of the modules is a wireless signal transmission module and another one of the modules is a battery compartment module.

The original specification does not teach how the extra modules 51 are releasably mounted to the base part at the same time. It appears that one of the modules (51) can be releasably mounted to the base part of the hearing aid housing at a time (see figure 5 of the present invention). As disclosed on page 12, lines 2-8; the modules 51 (an interface unit for wireless signal transmission of a programming plug-in unit, another audio input, a larger storage battery compartment, or a mechanical activating unit, see page 11, lines 12-16) can be stacked on the basic module of the hearing aid shown in figure 1.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
